

*Your business... only better.*

*Artifex: a Latin word that means "craftsmen".*

**Who We Are and What We Do.**

Artifex is a Latin word that means "craftsmen," which perfectly describes what we do. At Artifex Partners, we're dedicated to crafting outstanding Microsoft Dynamics NAV-based software solutions that help your organization increase

Artifex Partners offers personalized business software and expert advice to help medium-to-large companies increase efficiency, boost productivity and better control costs. We back our software systems with comprehensive training, state-of-the-art support and an unrivaled track record of client satisfaction.

business success and earn a rapid return on investment. Quite simply, our professionals are the best in the business. We build our solutions on the proven, flexible and stable Microsoft Dynamics NAV platform, which allows you to work in a "Microsoft Office®-like" environment that is both comfortable and familiar. This increases your productivity and minimizes the need for additional training.

We identify “*points of hope*”—those goals and dreams you have for your company.

#### Who We Serve.

We typically serve client organizations that have outgrown a static software system or require more than just a simple, “out-of-the-box” solution. Our clients generally have from 5 to 5,000 employees and annual revenue of \$5 million to \$500 million. We take particular pride in our ability to develop deep, long-

“...they not only have the **technical expertise** about their product—but they **understand** how to **communicate** with the end-users in a meaningful way.”

—**Scott Billings**, Commerce Street Capital

lasting relationships with our clients. How deep? Every single solution we’ve implemented since we began in 2000 is still running effectively—providing our clients with powerful tools and information for running their organizations efficiently.

#### What Sets Us Apart.

We’re not your average solution provider. That’s something you’ll notice right away. We begin by rolling up our sleeves and taking the time to develop a deep understanding of your organization.

We dig deep to discover your business “pain points.” But we don’t stop there. We also identify “points of hope”—those goals and dreams you have for your company. This knowledge allows us to craft a personalized software solution that not only helps you overcome your current issues, but also anticipates your needs and positions you for additional success far into the future.

We back our software systems with the finest service and support you’ll find anywhere. In fact, the people who conduct our initial consultation with you are the same ones who perform your system implementation, handle your software upgrades and respond to your service requests. This allows them to provide high-quality, informed support and service—and ensure that you realize the full benefits of your system investment.
